^No data given by the University. Estimate is reported as per the large Fraser's sample size.

*For 2021 entry, UQ used the GPA in the rank (alongside GAMSAT) for interview selection, unlike in 2020 entry, where GPA was a cut-off 5 minimum hurdle.

%For UMq, GPA and GAMSAT are ranked together for interview selection. After interviews, only interview scores and GPA are ranked together for offer selection.

\$Scores for 2021 at Griffith were provided by the university as the median score, and not the average.

#For 2020 entry, GAMSAT was a cut off for interviews. For 2021 entry, each GAMSAT section was ranked before determining a medicine offer, and not the overall score (scores are reported as per averages from the large Fraser's sample size). The latter will be the method USyd will use for 2022 entry.
