FREQUENTLY ASKED QUESTIONS

What do the Day Drops do?

This innovative food supplement is made of natural ingredients that contributes to the normal macronutrient metabolism with chromium and normal energy-yielding metabolism with biotin among many other benefits.

What do the Night Drops do?

The Night Drops (food supplement) formula provides key amino acids and adaptogenic herbs like holy basil added specifically to help promote feelings of restfulness and calm. By maintaining your ideal internal balance, your efforts to transform your life are maximised.

What is the recommended dosage of Day and Night Drops?

Day Drops: Drink a glass of water (250 ml) and shake well before using. Take 15 drops (0.7 ml) 20-30 minutes before breakfast, lunch and dinner. Do not exceed the daily recommended portion.

Night Drops: Drink a glass of water (250 ml) and shake well before using. Take 2 ml one to two hours before bedtime. For best results, do not eat after taking drops. Do not exceed the daily recommended portion.

Can I keep using the Drops after the programme?

Each person is different. It is completely up to you. If you feel the drops are helping even after the programme, you can continue using them.

Can I still drink coffee and drinks containing caffeine while using Day & Night Drops?

Sure! The drops contain only a small amount of caffeine, roughly the equivalent of a quarter-cup of coffee.

Can I take Day & Night Drops if I am allergic to one of the ingredients or am taking medication?

Always consult a doctor prior to beginning any new food supplement if you have allergies or are taking medication.

Can I take Day & Night Drops if I am pregnant or breastfeeding or have a medical condition?

Always consult a doctor before beginning any new food supplement while pregnant or breastfeeding or if you have a medical condition.
