

Trusted Workforce Development Partner for State, Local & Education (SLED)

Build critical capabilities. Reduce risk. Deliver measurable outcomes.

State and local governments face increasing pressure to modernize technology, strengthen cybersecurity, and responsibly adopt AI—while operating within strict procurement, compliance, and workforce constraints. Learning Tree International partners with SLED organizations nationwide to design and deliver scalable, role-based training programs that convert learning investment into demonstrable workforce capability.

With decades of experience supporting state agencies, school districts, courts, health agencies, and statewide IT academies, Learning Tree helps public sector organizations move beyond one-off courses to sustained, defensible workforce development aligned to real operational needs.

Why SLED Organizations Choose Learning Tree

Contract-ready, low-friction engagement through established cooperative and state vehicles

- Build job-ready capability through role-based learning pathways
- Support enterprise-wide workforce transformation at scale
- Deliver measurable learning outcomes with expert practitioner-led programs

What We Deliver

● Technology & Digital Skills

Cloud, data, AI, analytics, automation, Microsoft Power BI and Copilot with role-specific learning paths

● Cybersecurity & Risk

Workforce readiness assessments, certification-aligned training, governance, cloud security, and emerging AI security

● AI Workforce Framework

AI leadership, Copilot, ChatGPT & Claude enablement, Responsible AI governance, AI literacy, and advanced AI & data skills.

● Leadership & Business Capability

Leadership development, change management, workforce transformation, strategic planning, communication, and organizational effectiveness.

● Project Management & Agile

Project and program management, Agile practices, business analysis, IT service management, and process improvement.

● State IT Academies & Custom Programs

End-to-end academy design, curriculum aligned to state strategy, instructor-led, virtual, hybrid, and on-demand delivery

Proven Success Across US SLED
