Key Roles In SAFe

SAFe Practice Consultant (SPC)

An expert change agent vital in implementing SAFe, blending tech expertise with drive to enhance software, systems, and Agile processes.

Release Train Engineer (RTE)

Supports the coordination and execution of various Agile Release Train (ART) events and procedures.

The Scaled Agile Framework (SAFe) roles align team efforts with organizational goals, ensuring seamless collaboration, efficient value delivery, and fostering an environment where Agile practices thrive.

Scrum Master

A servant leader and coach for an Agile team who facilitates team events and processes, and supports teams and ARTs in delivering value.

Product Owner/ Product Manager

Establishes and manages feature priorities to ensure the delivery of value through collaboration with teams.
