

ALIGNING PEOPLE, PROCESSES & TECHNOLOGY TO HELP WITH A FULL AWS MIGRATION

CHALLENGE: A Large Insurance Company has a Mandate to Have a Full Migration to AWS by 2022

The company uses AWS for high-performance computing, risk analysis of customer data, and to create test and development environments for its commercial applications. To meet the mandate involves training of AWS for various end users for about 1,000 IT members and about 2,000 non-IT members.

SOLUTION: Customised Workforce Optimisation

The company is investing in the development of over 3,500 employees to help them become fluent in AWS.

In addition to providing fundamental AWS training are reinforcement workshops to ensure consistent application across the organisation.

Learning Tree worked with the company to provide hands-on training exercises that aligned to the company's use of the technology.

KEY RESULTS

Over 3,500

employees trained to fully migrate to Amazon Web Services (AWS)

Consistent AWS Application

across the organisation with AWS reinforcement workshops

Business Case for Your Organisation

More than 85% of enterprises are cloud-based.

Since 2014, Learning Tree has been delivering Amazon Web Services training to the company's various IT teams, including developers, architects, and IT managers. Learning Tree has also been asked to help grow the company's internal AWS best practices and host a series of AWS hands-on workshops across the organisation. We can work with your company to provide training and coaching to maximize knowledge gain any new software or technology.

“The instructor was absolutely excellent. He gave a great overview of AWS services and brought real world, enterprise examples. Couldn't have been better.”

-T. Gibson, Technologist
