

Enterprise data as a service

Gather, manage and provide access to enterprise data

200

specialized engineers

10

years of experience

5

Fortune 500 clients

Global

presence in the US,
Europe and Asia

100%

open source and
cloud-native

From data collection to business insights

Ingestion from
batch and real-
time sources

Unified processing
of batch and
stream data

Automated
governance and
quality

Rich and secure
access layer via
portals and API

Data science,
analytics, reporting,
dashboards.

On premise, cloud-native, or hybrid analytical data platform
Powered by Grid Dynamics platform and data engineers

Google Cloud Platform

We make the data work for you

PLATFORM OPTIMIZATION

Optimize performance, build access layer, add data governance.

CLOUD MIGRATION

Migrate to native or hybrid cloud platform without disruption.

DATA ENGINEERING

Gather and process data with quality automation and AI/ML.

Grid Dynamics delivers

5PB
data in the
platform

300,000
events/sec
data streams

GOVERNANCE
and quality
automation

AI & ML
platform for
data science

API
access to data
as a service

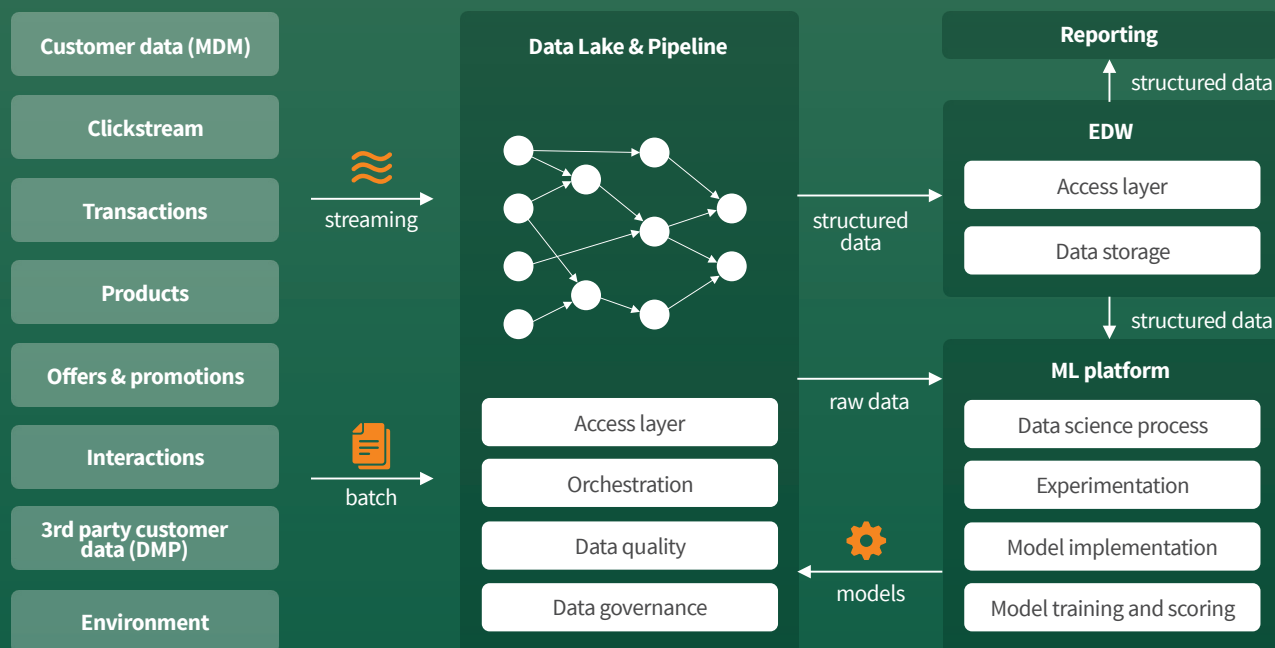

SECURE
access and
data masking

CLOUD-NATIVE
or hybrid
deployments

Analytical data platform

Manage enterprise data with an open source or cloud-native platform

Leverage our blueprint

Analytical data platform capabilities
