

10

Useful Tips for Working with the Talented and Challenging Tech Worker

01

Brains Run On Logic Not Feelings

You think those body sensations tell you important details. We don't see them as information or input.

02

No Filter Between Brain & Mouth

What is in our mind comes out our mouth with no regard to anything other than factual accuracy.

03

Meaning is Only In The Words

Tone of voice and body language just happen for us. It is not part of our communication so ignore it.

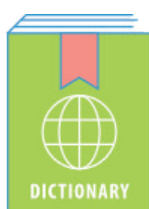

04

Look In Your Eyes Means Nothing

We get nothing from eye contact except distraction. No eye contact can help us think and converse better.

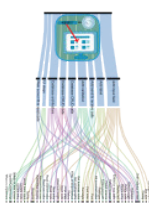

05

We Use Words Literally and Exactly

Dictionaries exist to give distinct meanings. The dictionary definition is all and only what we mean.

06

Our World is Built From Details

We may talk too much giving you the details or ask too many questions so we can get the details.

07

Black or White, Not Gray

Our minds work digitally like a computer and it's binary code. It is a 0 or 1, there is nothing else.

08

Our Brain Doesn't Do Feelings

Body sensations are not information. We don't understand our own feelings, much less yours.

09

Vulcan School of Etiquette

We speak logically, literally, and are often Brutally Blunt. Body language and vocal tone are not under our control.

10

Passion Can Appear as Anger

We are passionate and excited about what we enjoy. This makes us get louder and seem like we are mad.
