Senior Mobile Software Developer – iOS

Who we are

Welcome to the world of electric cars!

PlugSurfing is Europe's largest charging station network and a pioneer in mobile payments for electric car charging. We build digital products that enable electric car drivers to charge their car anywhere, anytime. If you share our passion for enabling zero emission driving we would like you to join us as a Senior Mobile Software Developer iOS to play a pivotal role in creating charging point networks in Europe and establishing tomorrow's mobility solutions. We shape the future of mobility and energy - and we want YOU to be a part of this!

Your role

- You are a team player with excellent analytical skills with a good problem-solving attitude.
- You are responsible for creating new application features and translating client requirements to new features.
- You collaborate with development team and other IT staff to set specifications and to provide high-quality coding for new applications.

Top reasons to work with us

Working in an international and cross-functional self-organising team with lots of empowerment and high level of responsibility. You will have an exciting front row perspective on the development of global new generation IT solutions with a steep learning curve.

- High level of personal responsibility from day one.
- We connect dozens of leading brands with thousands of customers.
- As a first mover we are always open for innovation.
- We are a close knit, casual but target oriented team of 30+ people that collaborates together very strongly.
- We offer a unique combination of an agile startup environment backed by a global shareholder, providing great career opportunities.

Your qualifications

- You have BSc in Computer Science or equivalent experience.
- You have vast experience as a mobile app developer and can demonstrate portfolio of released applications on the App store.
- You have in-depth knowledge of at least one programming language like Swift and Objective C.
- You have experience with third-party libraries and APIs. OOP design principles are familiar to you.
- Experience with Git, Github, Pull Request and Rebasing.
