AGILE TRANSFORMATION INITIATIVES

Contemporary Agile Frameworks – **SCRUM, Lean Kanban, SAFe, Lean Six Sigma, or DevOps** – are accelerating the capabilities of organisations across the globe to respond to changes in an increasingly volatile, uncertain, and complex business environment, while simultaneously meeting ever higher expectations of performance and delivery from customers and stakeholders.

Learning Tree offers the most robust **Agile training** portfolio of any learning services provider to *support your unique Agile transformation needs*.

What Is Agile?

Agile is a mindset; it is a way of being and working on a small amount (increment) in a small time block (iteration). Instead of in-depth planning at the beginning of the project, Agile methodologies are open to changing requirements over time and encourage constant feedback from the end-users. Cross-functional teams work on iterations of a product over a period of time, and this work is organised into a backlog that is prioritised based on business or customer value. The goal of each iteration is to produce a working product

In Agile methodologies, leadership encourages teamwork, accountability, and face-to-face communication. Business stakeholders and developers must work together to align the product with customer needs and company goals.

Why Agile?

Agile can help you streamline project management tasks and optimise product delivery — on time and within budget.

METHODOLOGY VS FRAMEWORK:

- **METHODOLOGY** — a set of principles, tools, and practices which can be used to guide processes to achieve a particular goal.
- **FRAMEWORK** — a thin structure of mandatory rules that gives maximum room for self-organising teams to choose for themselves the processes and practices that best fit their particular context

40%

of development teams using traditional waterfall techniques fail to adapt to continuous change

Info-Tech Research Group

37%

of Agile projects get to market faster than regular projects

Innotas

67%

of organisations with high overall agility complete project within budget

A Holistic Approach To Optimise Your Workforce

- › Based on your specific Agile needs, our experts will ensure your workforce is equipped with a clear objective for the Agile capability you intend to achieve, including its interface with existing roles and processes

- › Create a clear business plan that establishes the goal and vision of your Agile adoption fit for your specific context, and establish the necessary cultural, mindset, and behavior changes for successful Agile transformations

- › Determine the KSAs of your existing staff and identify skill gaps using automated skills assessments

- › Develop a customised Agile curriculum with individual learning plans to meet the needs of your staff and organisation

- › Create your organisation's own Agile capability and unique cultural and mindset shift by coaching the coaches and training the trainers

- › Embed our expert instructors to help your staff apply newly gained Agile skills on the job

- › Rapidly increase the process maturity of your Agile staff with customised Acceleration Workshops

- › Develop Agile Coaches to take over internal Agile support and ongoing training

Featured Expert Instructors: Real-World Agile Practitioners

ESHAN CHAWLA

**President of Innovative Informatics Incorporated,
Learning Tree Agile and Project Management
Author, Instructor, Coach, and Consultant**

Eshan's past three decades of experience blends private technology and business consulting in private and public sectors, with numerous certifications spanning more than half a dozen Agile frameworks. He provides unique and pragmatic perspectives to innovatively guide and coach clients through consulting and training engagements. He has been working with Agile frameworks for over two decades — even prior to the term itself being coined.

ALAN O'CALLAGHAN

Director and Principal Product Owner at Emerald Hill Limited; Certified Scrum Trainer and Learning Tree Agile Instructor, Coach, and Consultant

Alan has more than 20 years of experience as a Scrum practitioner, Agile coach, and consultant. He has helped large corporations launch Agile transformation initiatives, supported start-ups and small and medium-sized organisations with Scrum, and improved teams and organisations that already had Agile experience.

The Right Agile Foundation

Learning Tree has designed a course to:

- Introduce the fundamental values and principles of Agile
- Provide hands-on exercises in each of the most popular Agile frameworks in the industry
- Use this solid understanding of the different frameworks to select the follow-on training that will work best for your organisational culture and infrastructure.

**Agile Fundamentals: Scrum, Kanban, Lean and XP —
Learn More at: [LearningTree.co.uk/918](https://www.learningtree.co.uk/918)**

DEVOPS INSTITUTE

The DevOps Institute's community of recognised thought leaders foster a workplace culture that stresses communication, collaboration, integration and automation in order to improve the flow of work between software developers and IT operations professionals. DOI is the continuous learning community around emerging DevOps practices, setting the standard for competency-based training and certification. Their comprehensive offering builds on the foundational knowledge to provide in-depth, job-role specific training.

Learn more at:
LearningTree.co.uk/DOI

LEAN KANBAN UNIVERSITY

Lean Kanban University (LKU) is a program run by the champions of the Kanban method, a popular methodology for organising and managing workflows and processes. LKU offers the Team Kanban Practitioner (TKP) Certificate and the Kanban Management Professional (KMP) certificate. LKU Kanban certifications do not require any examination; you just need to attend accredited courses.

ICAGILE

ICAgile's Learning programmes provide the transformational learning needed to ignite business agility. Business agility journeys are catalysed by cultural and behavioural shifts that start with leadership and are enabled by strategic and structural changes in an organisation. ICAgile's Learning programmes enable these shifts, which are key to creating the environment for exceptional products, mission-aligned outcomes, and delighted customers.

LearningTree.co.uk/ICAgile

LEAN SIX SIGMA

Lean Six Sigma is a powerful methodology for improving existing processes. The combined power of lean (used to remove waste and increase flow), and six sigma (used to reduce variation in a process) will improve overall quality of a product and optimise time and budget. Learning Tree has partnered with the Thayer School of Engineering at Dartmouth college to bring you the Lean Six Sigma Yellow Belt, Green Belt, Black Belt, and Master Black Belt.

SCRUM ALLIANCE

Scrum is the most popular framework used in Agile environments and is designed to help Scrum Teams manage complex projects. Scrum is recognised for its success on software development projects, but it works well for any complex, innovative scope of work. The Scrum framework consists of Scrum Teams and their associated roles, events, artifacts, and rules. Each component within the framework serves a specific purpose and is essential to Scrum's success and usage.

Learn more at: LearningTree.co.uk/SCRUM

PROJECT MANAGEMENT INSTITUTE®

PMI's Agile training is also method-agnostic, however this certification training is experience based and is not role specific. The Project Management Professional (PMP) exam has recently been updated to integrate more agile methodology into its body of knowledge. The PMI Agile Certified Practitioner (PMI-ACP®) is PMI's fastest growing certification. It is designed for those who are in, or want to move into, a leadership role, in addition to those who would like a certification for having been implementing Agile values and principles in their day-to-day project work for a few years.

SCALED AGILE

SAFe is a Lean-Agile, role-based framework, that addresses software and systems development at the enterprise scale. SAFe synchronises alignment, collaboration, and delivery amongst large numbers of Agile teams. SAFe offers Agile management guidance at the team, program, and portfolio levels to support delivery of value incrementally at scale.

SAFe® Implementation Roadmap
