

Get DoDM 8140.03 Qualified with Learning Tree's Approved Training

Your Path to Cyber Workforce Excellence

The Department of Defense Manual (DoDM) 8140.03 isn't just another set of rules – it's your roadmap to becoming an elite member of the DoD cyberspace workforce. It sets the gold standard for identifying, qualifying, and managing cyber professionals across all branches. Think of it as the playbook for building a unified, highly skilled cyber force ready to tackle any challenge.

Qualification and Maintenance Requirements

The cybersecurity field demands a strong foundation, which can be acquired through various avenues.

Foundational Qualification:

Encompasses basic to advanced proficiency levels, attainable through industry-recognized certifications, comprehensive training programs, or dedicated educational pathways.

Residential Qualification:

Designed for those already employed in the field, this qualification ensures comprehensive coverage of all relevant tasks, knowledge, skills, and abilities (KSAs) essential for the specified work role, fostering on-the-job proficiency.

Annual Maintenance:

To ensure professionals stay abreast of evolving technologies and threats, certifications must be maintained through ongoing Continuous Professional Education (CPE) credits or a minimum of 20 hours of relevant training annually.

Don't Wait – Get Qualified Now!
