

TAKING THE FAST TRACK TO AGILE SUCCESS

Agile is on the rise, and it's no wonder why — adopting Agile means you can adapt to continuous change, improve speed to market, and complete projects within budget.

40%

of development teams using traditional Waterfall techniques fail to adapt to continuous change.

— Info-Tech Research Group

37%

of projects get to market faster than regular projects when using Agile.

— Innatas

67%

of organizations with high overall agility complete projects within budget.

— PMI, Pulse of the Profession 2015

Implementing Agile Methodologies Requires More Than a One-Track Mindset

Learning Tree has partnered with the top Agile organizations to bring you Agile training and certification for all IT business roles — from developers and programmers, to project managers and business analysts — to create an environment where Agile projects can thrive.
