CERTIFICATE PROGRAMME

DUKE CE ADVANCED LEADERSHIP CERTIFICATE PROGRAMME

Creating People-First Leaders

Prepare to Navigate Today's Complex Organisational Challenges

In Partnership with Duke CORPORATE EDUCATION

Throughout the Duke CE Advanced Leadership Certificate Programme, individuals are equipped with the essential mindsets and skillsets to become people-first leaders in today's fast-paced and intricate work environments. Emphasising the core belief that organisational performance is intrinsically linked to people, attendees emerge as adept leaders who prioritise human connections and understand the pivotal role of individuals in achieving collective success.

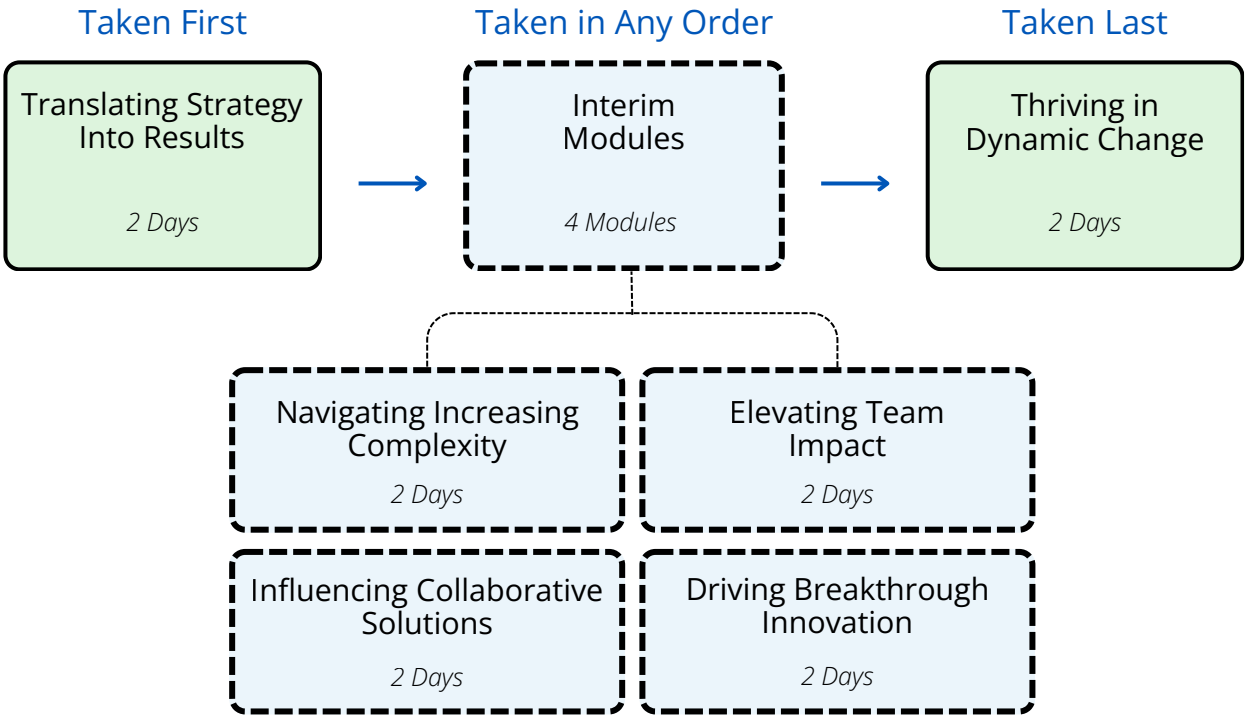

About the Programme

Duke CE Corporate Education was ranked #1 in 2023 by the Financial Times for custom education worldwide.

For the Duke CE Advanced Leadership Certificate Programme, Duke CE Corporate Education brings its world-renowned leadership education and business acumen to bear on Learning Tree's extensive experience training the world's best technologists in business and government. By connecting the cutting-edge academic research of the Duke Fuqua School of Business's faculty with the real-world experience and practice of Learning Tree's instructors, we have created a unique opportunity for mid-level leaders to advance their leadership skills from the best in the business.

Duke CE Advanced Leadership Programme

The Programme Path Consists of 6 Modules

There is no time limit for completing the full certificate programme.

Benefits of the Programme

The Duke CE Advanced Leadership Certificate Programme stands out from other leadership programmes by offering a unique blend of cutting-edge insights, practical strategies, and experiential learning opportunities tailored for navigating modern business complexities. Participants benefit from personalised guidance, interactive sessions, and hands-on activities that foster innovation, effective communication, and motivation in fast-paced environments. This programme provides:

- **Action learning experiences that include simulations, case studies, peer problem-solving, and more**
- **Adoption-based return on investment**
- **Engaging inquiry-based transfer of knowledge versus lecture**
- **On-site course delivery**
- **Global scalability**

Our Integrated Learning Model

For all of our programmes, we have developed a unique integrated learning model that optimises skills training and promotes deep understanding of the material. We based this model on our extensive experience delivering outcome-based training and with the input and insight of the top practitioners and instructors in each field.

The model consists of four crucial elements required for deep learning:

Assessment

Each programme begins and ends with an assessment, which is critical to ensuring that every student achieves their learning objectives.

Training

At the core of each programme is in-depth instructor-led training offered both in person and virtually to accommodate all student needs. In either case, students benefit from live lessons and interactions with experienced instructors with significant real-world experience in their areas of expertise, as well as with their fellow classmates.

Coaching

The group coaching we offer in between each course is where some of the most important learning of our programmes happens.

Collaboration

Collaboration is a powerful element of our integrated learning model that maximises deep learning by sharing experiences, knowledge, and tools among students (and instructors).

Programme Key Features

Through a partnership with Duke CE Corporate Education and the faculty at the Duke Fuqua School of Business, we interviewed top executives at major companies and governmental organisations in the US and around the world to uncover the most crucial skills gaps in leadership today. Through those discussions, six leadership capabilities emerged as the most critical – and lacking – skills required for success in today's complex and fast-paced environments. We have designed this programme to include:

- Six courses that each address a critical leadership area
- Designed for experienced project and programme managers
- Duke CE Corporate Education certificate upon programme completion
- In-person learning with colleagues
- Two full days per course (12 days total)

What students are saying

"Class was great! Loved the material and the case studies, they hit close to home." *-Joshua F., Lead Technologist (Professional Services)*

"Everyone should take this course. Organisations will be better for it, and it is necessary for professional development."
-Kareema P, Chief of Staff (Government)

Build Your Plan for Breakthrough Innovation With Learning Tree International's Training Today.
