

EMPOWER YOUR ORGANISATION FOR THE AI ERA

Discover targeted, scalable solutions that build AI readiness, enablement, and adoption across your workforce. Learning Tree's role-based model helps individuals grow in confidence and capability while enabling organisations to realise sustainable, measurable AI impact.

AI READINESS

Building foundational AI knowledge and trust

Ideal for: Non-technical staff, business leaders, and early-stage learners

You will:

- Understand what AI is — and what it is not
- Learn responsible, ethical, and compliant AI use
- Establish a mindset of curiosity and experimentation

These roles shape policy, culture, and risk tolerance. They must understand AI before it's operationalised.

Executive Leader	Compliance Officer	Ethics Officer	HR Leader
Operations Manager	Policy Advisor	Risk Manager	Strategic Planner

AI ENABLEMENT

Applying AI tools and practices in job roles

Ideal for: Functional teams, business analysts, and digital workers

You will:

- Apply AI to real workflows, reporting, and decision-making
- Develop prompt engineering and workflow integration skills
- Build confidence through guided experimentation

These roles turn AI from theory into productivity.

Business Analyst	Business Strategist	Product Manager (Business)	Project Manager
Marketing Manager	Finance Manager	Data Analyst	IT Consultant

AI ADOPTION

Embedding AI for enterprise-wide impact

Ideal for: Developers, data teams, and IT leadership

You will:

- Embed AI into enterprise platforms and processes
- Align leadership, governance, and change enablement
- Prepare the organisation for continuous learning and future readiness

These roles ensure AI is integrated into systems, workflows, and culture to deliver lasting value.

AI Engineer	Data Engineer	Data Architect	DevOps Engineer
ML Engineer	Product Manager (Technical)	Software Engineer	Technology Advisor

Why Learning Tree?

- Industry-leading instructors & practical labs
- Role-based learning aligned to business outcomes
