

Defense Contractor

Early Careers Program

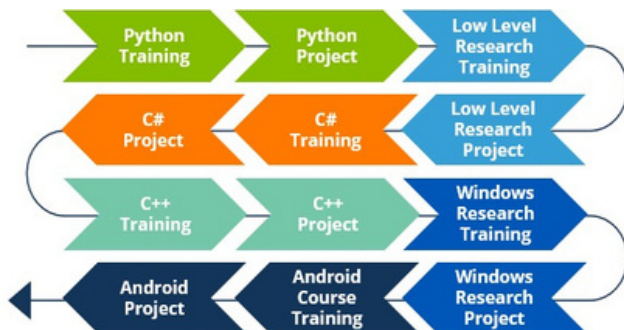

CLIENT CHALLENGE:

Required a learning partner for the development and delivery of a multi-modal graduate training program to prepare graduates for undertaking billable work to a high standard within National Cyber Security Software development and analysis. The program had to be designed to incorporate technical skills that their clients most demand, across six programming and research topics.

OUR SOLUTION:

- 22-week full time early careers program combining training and coaching sessions.
- Designated Learning Tree Project Team.
- Incorporated student guides and collaboration channels with Instructor feed.
- Activity based learning - project work completed in teams incorporating group presentations individual assignments.
- Project marking and feedback reports.
