

Global Financial Services Firm Sought Global Professional Development Partner

CHALLENGE:

This global financial services company (230k+ employees; operating in 140 countries) was seeking a best-in-class supplier for IT training and services.

The firm’s training program consisted of a decentralized vendor ecosystem that generated more than 1,000 independent training requests, executed by well over 100 external vendors. These complexities made it difficult for the firm to consistently and effectively develop a technically capable, business-savvy workforce.

80% of training was ad-hoc; not aligned to enterprise strategies

Training often not linked to strategic initiatives

Inconsistent governance of training delivery, quality, and results

Inability to leverage economies of scale

Significant inefficiencies due to countless, and varied vendor processes, and invoicing

SOLUTION:

Learning Tree was selected as the preferred vendor based on past performance and global training capabilities. Using a managed training supplier model, Learning Tree was able to provide a higher level of customer service, resulting in significant cost savings.

The Learning Tree Solution:

- **A dedicated program manager** to lead internal operations and 3rd party requests
- **A professional development program with built-in custom curriculum** for multiple lines of business including the Global Consumer division, Institutional Banking, and the Enterprise Project Management Office
- **We provide a holistic approach -** technology, leadership, business acumen
- **Support global delivery** to employees in over 20 countries

KEY OBJECTIVES

- Reduce aggregate vendor management costs
- Transition to globally-focused, modular-design, virtually-delivered private group professional development
- Professional development incorporates firm-specific requirements
