SECOND OPINION

Providing peace of mind on your fertility journey.

While you are seeking fertility treatment, it's normal to wonder if another doctor could offer more information or a different treatment option. You might want to find one who can look at your test results, talk with you about your personal situation, and maybe give you a different take on it. Getting a second opinion can help you feel more sure about your treatment plan. We are here for you so you can begin your treatment plan with confidence.

IVFMD is offering a free consultation to all patients that bring us a copy of their medical records from another Reproductive Endocrinologist located in the United States. In doing so you will eliminate some, if not all of your prescreening cost and we will waive our consultation fee.

Your chart must be current—within one year of your new patient appointment—and you must be 48 years of age or younger. Records must contain pertinent information about your fertility workup and must be received one week prior to the date of the Free Second Opinion Consultation you schedule.

New patient consultation must be an in-person appointment; telemed or virtual appointments are not eligible. This offer is made in an effort to educate you about all your infertility treatment options.

Let us investigate and work on your behalf. To get started, please provide us your insurance coverage, **then mention this offer when scheduling and provide form upon check in to your new patient consultation.**
