

## Möbius Deprecation Policy

DigitalEd is committed to supporting our customers with the highest quality of service possible. Our approach to version updates moves towards a continuous delivery process; where you are constantly receiving updates to the platform on a frequent basis. DigitalEd reserves the right to deprecate previous versions or components of Möbius when necessary to ensure optimal performance and security for our users.

Should DigitalEd determine that a version or component of Möbius is to be deprecated, communications will be delivered to customers as milestones according to Figure 1 below. Communications will contain information about why said version or component is being deprecated and what functionality will supersede it.

Figure 1 - Möbius Deprecation Schedule

# of Months	Description
0 Months	DigitalEd communicates to Möbius users that a version or component will be deprecated. <ul style="list-style-type: none"><li>- End of sale for deprecated version or component.</li><li>- Maintenance period begins for deprecated version or component.</li></ul>
6 Months	Reminder of deprecated version or component.
12 Months	Last reminder of deprecated version or component.
18 Months	Version or component is deprecated and all maintenance and support is ceased.

### Definitions:

- End of sale: Version or component that is to be deprecated will no longer be sold to customers.
- Maintenance period: Customer Success will continue to support customers as they transition to new functionality.
