

ALIGNING PEOPLE, PROCESSES & TECHNOLOGY TO SUPPORT IT SERVICE MANAGEMENT TRANSFORMATION

CHALLENGE: A Large Hospital is Committed to Standardising IT Across the Platform

The organisation is committed to becoming the top hospital system in the United States. They plan to reach this goal through aligning regional hospitals and merging service desk operations to improve customer satisfaction.

SOLUTION: Baseline Training for IT Leaders

The hospital is investing in the development of over 150 of its IT leaders. By creating a baseline, they hope to deploy a top-to-bottom approach for implementing best practices.

The goal of the training is for IT leaders to help define the services provided, create repeatable processes, set expectations of service, and create a common vocabulary for the IT organisation.

The company has also benefited from Learning Tree's technology and web-based learning resources that help the students prepare and pass their certification exams.

KEY RESULTS

Over 150

IT leaders trained to help the organization become the top hospital system in the U.S.

Improved IT Service Delivery

through aligning regional hospitals and merging service desk operations

Students rated on average a course grade of 3.57 on a 4-point scale

Business Case for Your Organisation

A survey of 1,217 technology leaders shows 55 % of CIOs having yet to tap on the capabilities of IT to deliver customer experience¹

Learning Tree is providing ITIL training for over 150 of the hospital's IT leadership team. Improved service management within the IT organisation is a top priority for the hospital's CIO, and is expected to help the organisation in its goal to become the top hospital system in the US. Learning Tree can partner with your organisation to ensure your service delivery goals are achieved and be a resource in shaping your service management practice.
