44.5%

of companies have a complete incident response plan.

- Skyhigh Networks

331.2 Billion

is the estimated Public Cloud Service Revenue Forecast, nearly a 3X growth of overall IT Services

- Gartner

Optimize Your Cloud Computing Workforce by Creating Alignment Between People, Processes & Technology

PEOPLE

The shift to cloud computing is a substantial investment, so it is critical to quickly instill confidence in your team with the skills and knowledge they need to implement and maintain your program. We assist with planning paths, training skills, and clearly defining job roles to make things simple and cost-efficient for you and your team.

PROCESS/POLICY

As numerous recent breaches have shown, having the right policies in place ahead of time can protect your customers and your organization. Besides risk mitigation, you should also be prepared for change and challenges by leveraging cloud computing best practices. Preparation pays off by giving your organization a proactive rather than reactive stance.

TECHNOLOGY

Cloud computing shifts the way your organization approaches technology – especially in terms of integration with legacy systems, training, and risk management — and we're here to help. We offer end-to-end training and hands-on support for you and your team, including assistance in planning, installing, integrating, and securing the latest cloud technology.

Learning Tree's Cloud Computing Training
Make your cloud migration and integration simple and scalable

Learning Tree's cloud computing capabilities go beyond our course curriculum. Learning Tree can work with you to manage cost and security concerns, ensure your staff has the right skills, and that those skills can be applied directly on the job. Our expert instructors can serve as embedded advisors to guide your staff through cloud implementation and adoption — simultaneously helping your organization capitalize on your investment, ensure risk mitigation, and enhance the skills of your staff.
