

Defence Contractor

Early Careers Programme

CLIENT CHALLENGE:

Required a learning partner for the development and delivery of a multi-modal graduate training programme to prepare graduates for undertaking billable work to a high standard within National Cyber Security Software development and analysis. The programme had to be designed to incorporate technical skills that their clients most demand, across six programming and research topics.

OUR SOLUTION:

- 22-week full time early careers programme combining training and coaching sessions
- Designated Learning Tree Project Team
- Incorporated student guides and collaboration channels with Instructor feed
- Activity based learning project work completed in teams incorporating group presentations individual assignments
- · Project marking and feedback reports

Learning Pathway

RESULTS:

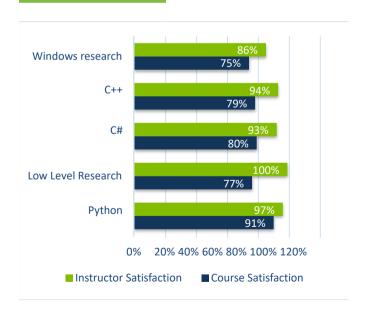

44 TEACHING DAYS

60 PROJECT DAYS SUPPORTED BY ON-SITE COACHING
