

ISSI validation report

Microsoft Azure Partner
Specializations

Grid Dynamics & Microsoft Azure

Power innovative digital solutions in Microsoft Azure cloud, coupled with implementation expertise and best practices for ultimate scalability, flexibility, and cost-efficiency.

Grid Dynamics is a Microsoft Gold Consulting Partner

ISSI validations

Information Security Systems International (ISSI) manages Partner Audit Programs for the world’s industry-leading cloud services companies, and works directly with Partners to help them achieve program compliance. Through a series of ISSI audits, our Microsoft Azure Specializations are ISSI-validated. The objective of ISSI validation reports is to assess Grid Dynamics' capabilities against the requirements of the Microsoft Azure Specialization Programs.

Kubernetes on Microsoft Azure Specialization

ISSI validation

Kubernetes on Microsoft Azure strengths

The following organizational strengths were noted during the ISSI audit:

- Grid Dynamics was able to demonstrate several key staff members who have all of the necessary credentials and competency to provide highly effective and efficient solutions for their AKS projects.
- Grid Dynamics has developed a set of well-defined standardized document templates that are used during the discovery phase for the assessment process.
- Grid Dynamics has been able to achieve the Microsoft Gold Partner credentials for Data Analytics, Application Development, Application Integration, DevOps and Datacenter.
- Grid Dynamics has been able to develop a highly skilled and mature technical team that has acquired valuable best practices which they have converted into several methodologies and processes.
- Grid Dynamics has developed a training site called Grid Dynamics University Training Portal, which is an extensive library of online training material for all of their staff, that also allows them to track the progress of the development of each of their employees.
- Grid Dynamics was able to demonstrate a high level of maturity and expertise in the development of automated deployment scripts that have been standardized to provide a more accurate and efficient deployment of the services and components that were proposed in the solution design phase.
- Grid Dynamics is highly committed to continuing to evolve and improve their Azure practices and demonstrate a more mature approach in the planning, design and deployment of their customer projects.

DevOps with GitHub on Microsoft Azure Specialization

ISSI validation

DevOps with GitHub on Microsoft Azure strengths

The following organizational strengths were noted during the audit:

- Grid Dynamics provided a detailed and standardized documented Cloud Adoption Framework that has been integrated into their practices.
- Grid Dynamics has been able to achieve the Microsoft Gold Partner credentials for Data Analytics, Application Development, Application Integration, DevOps and Datacenter.
- Grid Dynamics has been able to develop a highly skilled and mature technical team that has acquired valuable best practices which they have converted into several methodologies and processes.
- Grid Dynamics has developed a well-defined Delivery Process Documentation Kit which includes several standardized templates that are used to document a customer's project in all of its stages.
- Grid Dynamics has developed a training site called Grid Dynamics University Training Portal, which is an extensive library of online training material for all of their staff, that also allows them to track the progress of the development of each of their employees.
- Grid Dynamics was able to demonstrate a high level of skills and expertise in developing automated Terraform modules that have been integrated into their Repeatable Deployment methodology.

Infra and Database Migration to Microsoft Azure Specialization

ISSI validation

Infra and Database Migration to Microsoft Azure strengths

The following organizational strengths were noted during the audit:

- Grid Dynamics has been able to achieve the Microsoft Gold Partner credentials for Data Analytics, Application Development, Application Integration, DevOps and Datacenter.
- Grid Dynamics has been able to develop a highly skilled and mature technical team that has acquired valuable best practices which they have converted into several methodologies and processes.
- Grid Dynamics was able to demonstrate a high level of maturity and expertise in the development of automated deployment scripts that have been standardized to provide a more accurate and efficient deployment of the services and components that were proposed in the solution design phase.
- Grid Dynamics is highly committed to continuing to evolve and improve their Azure practices and demonstrate a more mature approach in the planning, design and deployment of their customer projects.
- Grid Dynamics has developed a training site called Grid Dynamics University Training Portal, which is an extensive library of online training material for all of their staff, that also allows them to track the progress of the development of each of their employees.
- Grid Dynamics was able to demonstrate their level of maturity and skillset to offer a series of very unique solutions that were demonstrated during the presentation of the 3 customer projects that were used as evidence for all of the controls.
- Grid Dynamics continues to demonstrate a very efficient method of communication with their customers, which allows the customer to have a full understanding and transparency of the progress being made.
- Grid Dynamics was able to provide very detailed solution design documentation that demonstrated the thorough process and steps that they are taking to assure that all of the proposed solutions are the correct ones to fully comply with the customer's needs and expectations.

Analytics on Microsoft Azure Specialization

ISSI validation

Analytics on Microsoft Azure strengths

The following organizational strengths were noted during the audit:

- Strong sales and technical expertise in cloud technologies.
- Strategic alliance with Microsoft Azure as one of their cloud vendors.
- Grid Dynamics demonstrated to have a solid practice in multiple cloud technologies, for Analytics, in addition to Microsoft Azure Analytics. They have additional 3rd vendor strategic alliances to complement their solution.
- Grid Dynamics demonstrated to have a strong commitment to a successful outcome of the audit. They provided all the required evidence, and SMEs were involved in different points to provide additional feedback on the deployed solution.
