# Learning Tree Training Approved for DevOps Institute Continuing Education Credits (CEUs)

The following Learning Tree courses are eligible for DevOps Institute Continuing Education Credits to help you maintain your certification. The courses in this list will earn the attendee 8 DOI CEUs each.

Course #	Course Title	Total PDUs
3685	DevOps Foundation® (DOFD) Certification Training	8
3695	SecDevOps Foundation® (SDOF) Certification Training	8
3686	DevOps Leader® (DOL) Certification Training	8
3975	SecDevOps Practitioner® (SDOP) Certification Training	8
3694	Site Reliability Engineering Foundation® (SREF) Certification Training	8
3794	Site Reliability Engineering Practitioner® (SREP) Certification Training	8
3689	Continuous Testing Foundation® (CTF) Certification Training	8
3690	Certified Agile Service Manager® (CASM) Certification Training	8
3684	DevOps Engineering Foundation® (DOEF) Certification Training	8
1222	DevOps Engineering on AWS	8
8523	Designing and Implementing Microsoft DevOps Solutions Training (AZ-400)	8
3832	Thriving in Dynamic Change: Duke CE Certificate Course	8
3830	Navigating Increasing Complexity: Duke CE Certificate Course	8
3833	Elevating Team Impact: Duke CE Certificate Course	8
3835	Influencing Collaborative Solutions: Duke CE Certificate Course	8
292	Communication Skills Training	8
244	Assertive Communication Skills Training	8
903	Public Speaking Training: Create Compelling Speeches & Presentations	8
283	Neurodiversity: Hidden Culture and Learning the Language Training	8
3309	Diversity in the Workplace Training: Building Bridges of Understanding	8
3411	Emotional Intelligence Training	8
4666	Emotional Intelligence Essentials	8
294	Influencing Skills Training: Getting Results Without Direct Authority	8
4972	Conflict Management and Resolution Essentials	8
275	Virtual Team Management Training	8

# Dev Ops Institute Recertification Policy

- DevOps Institute certifications are valid for two years from their date of issue and must be renewed by this expiry date with the exception of partner exams, such as the VSM Foundation certification, which do not have an expiration date.
- Currently, only CEUs earned from DevOps Institute Certifications and SKILUp event attendance are automatically tracked.
- CEUs earned from all other DevOps Institute eligible activities, and those offered by DevOps Institute Authorized Partners and other industry-recognized, authorized vendors/providers are not. You must [submit a claim](#) for these with proof of completion from the relevant content provider and CEUs will be awarded when DevOps Institute validates your claim submission.
- [DevOps Institute Community Members](#) automatically earn CEUs for the completion of any subsequent DevOps Institute certifications and SKILUp event attendance within the 2-year qualifying period and may also self-submit activity information and certificates of completion to be counted toward their CEU goal. CEUs earned can be reviewed via the [Member portal here](#).
- CEUs will only be awarded for qualifying activities in the qualifying period (2 years).
- Individuals with more than one certification will need to earn 30 CEUs to recertify the first certification and then require 6 CEUs for every additional DevOps Institute certification.
- CEUs should be claimed by completing the [CEU submission form](#) which includes uploading proof of activity completion (certificate of completion, email copy, screenshot image) which includes your name, name of the activity, name of the provider, date the activity was completed, and duration of activity. If a certificate of completion is not available, a copy of an email from the provider or a screenshot confirming your activity completion or attendance containing these details can be uploaded.
- CEUs earned from live (in-person or virtual) attendance at DevOps Institute SKILUp Hours/Days/Festivals and certifications do not need to be submitted and will be automatically added to the individual's account by DevOps Institute. [Eligible activities](#) must be completed and CEUs must be earned within the certification's 2-year qualification period.
- **Most CEUs will be awarded 24 hours after claim, but it can take up to 7 days.**

[continued...](#)

## Dev Ops Institute Recertification Policy continued...

- You must submit your finalized item(s) before the end of the 2-year qualification period, however, we encourage you to submit claims promptly to avoid potential delays in your recertification. Recertification is based on the activity completion date, NOT the date you submit your claim.
- Active certification holders can complete any combination of eligible CEU activities to achieve the number of CEUs required for recertification.
- After the CEU goal is reached and the recertification certification renewal fee<sup>1</sup> of \$79 or \$99 (depending on location) is received (waived for [SKILup IT Learning+](#) annual subscribers), the certification will be re-issued on the renewal date for another two years.
- All certifications will be active for two years from the date certification is achieved as of February 28, 2022. Each time recertification requirements are met, the certification active status will be extended for an additional two years.
  - **For example:**  
Certified: Mar 1, 2022, expiration: Mar 1, 2024 – the member must earn 30 CEUs during this time. If a second Certification is achieved, certified July 1, 2023, with expiration July 1 2025 – the member must earn 6 CEUs during this time.
- Any candidates who earned a certification before February 28, 2022, will have received an email from DevOps Institute indicating their certification expiry date. The first renewal year will be 2024 on the calendar date the certification was earned. For example, if the certification was earned on July 1, 2019, the renewal date will be July 1, 2024.
- Certification holders are responsible for monitoring their certification status. The status of your certifications and number of CEUs awarded can be checked via the [Member Portal](#).
- Regular audits will be performed of CEU-eligible activities for technical rigor and assigned a specific CEU value. CEU claims that are not eligible will be deducted from the individual's account and the individual will be notified and may not qualify for recertification.
- **Important reminders:**
  - DevOps Institute does not provide extensions
  - It is your responsibility to recertify on time
  - Recertification email reminders are sent at 90, 60 and 30 days
  - Emails are sent to the address on record in the individual's profile
  - All activities related to DevOps Institute exams, membership, online learning and events should be done using the same email address.

# DOI CEU FAQ

## **How often do I have to renew my DevOps Institute certification(s)?**

DevOps Institute certifications are valid for two years from their date of issue and must be renewed by this expiry date with the exception of partner exams, such as the VSM Foundation certification, which do not have an expiration date. In order to renew your certification, you must collect 30 CEUs during the 2 years in which your certification is active. Individuals who allow their certification(s) to expire must retake the certification exam again to earn active certification status.

## **How do I know my certification's expiry date?**

All certifications will be active for two years from the date the certification is achieved as of February 28, 2022. Each time recertification requirements are met, the certification active status will be extended for an additional two years.

If you received your certification before February 28, 2022, you should have received an email from DevOps Institute indicating your certification expiry date. The first renewal year is 2024, so if you earned your certification before February 28, 2022, your expiration date is in 2024 on whatever month and day you originally earned your certification. For example, if you earned your certification on July 1, 2019, the renewal date will be July 1, 2024.

## **What if I have more than one certification?**

If you have more than one certification, your expiry date for each additional certification is two years from the award date, respectively. For additional certifications beyond the initial one, you need to earn 6 CEUs for each during the time they are active if you choose to renew them.

## DOI CEU FAQ continued...

### What options do I have to collect CEUs for renewal?

DevOps Institute Continuing Education Units (CEUs) are earned through the completion of various educational activities that support the upskilling of DevOps professionals. This includes DevOps Institute and other approved, industry-recognized, DevOps-related formal training courses and certifications including the following:

- DevOps Institute formal, instructor-led or online, certification training with an accredited Authorized Partner
- DevOps Institute certifications

You may also earn CEUs for DevOps-related events and webinars offered by industry-recognized vendors and providers.

Please refer to the list above of eligible Learning Tree courses. For more information, visit the DevOps Institute website: [Continuing Education Units Eligibility Criteria — DevOps Institute](#).

### How do I receive credit for my earned CEUs?

To make sure you receive credit for your Learning Tree course before the end of your 2-year active period, you must submit a claim here: [Continuing Education Submission — DevOps Institute](#).

Your submission needs to include proof of completion, which you can access in your My Learning Tree account.

### Which Learning Tree courses qualify and how many CEUs will I earn?

Please refer to the table above for eligible Learning Tree courses. Each eligible Learning Tree course that you complete will contribute 8 CEUs to the 30 CEU renewal requirement.
