

# Special offer for individuals with connections to Strategic Coach® to have access to the **PRINT® SURVEY** and *The Why of You* report!

PRINT®, short for “motivational ImPRINT,” is a transformational system that uncovers the core motivations for people’s behavior that usually operate at an unconscious level. It helps build mastery in leveraging these motivations to yield superior collaboration, productivity, and performance, especially in demanding entrepreneurial environments and among varied personalities, abilities, instincts, and perspectives.

The PRINT® System is designed to enhance one’s ability to meet goals and improve performance while developing greater individual awareness and group awareness. This is a vital benefit to any entrepreneurial company desiring to create a Self-Managing Company® and achieve transformational, 10x results. PRINT® offers a breakthrough system for progressive organizations that place high value in people and strive to maintain a positive culture of engagement, accountability, and synergy.
