THE POWER OF A DECADE

10 Ways to Support Data Science and AI for Good with

DataKind®

Over the past 10 years, we've seen how technology has led to the creation of new digital data, gaining new insights about our world and transforming almost every sector. The same algorithms and predictive technologies that companies use to boost profits can be thoughtfully leveraged by the social sector to improve the world. However, a decade later, most mission-driven organizations lack the resources or expertise to take full advantage of the data revolution.

Join us in addressing the world's most pressing challenges and propelling DataKind into the next 10 years of harnessing the power of data science and AI in the service of humanity.

Fund our programs

Support our most innovative work in the U.S. and around the world. From DataCorps® projects to our Center of Excellence work, catalyzing innovative data science solutions that result in tangible organizational and sector wide impact.

Sponsor an event

Champion high-impact, fast-paced DataDive® events and Discovery Days or sponsor our Global Volunteer Summit that convenes data do-gooders from across the globe.

Apply to volunteer

Donate your time and talent to help move the needle on critical issues like frontline health systems, economic resilience, and more, building your skills and networking with top data science professionals.

Double your donation

Check with your employer to see if they match financial donations and volunteer hours to nonprofit organizations, providing your organization with a unique pathway to gain market insight, build relationships, and share ideas with a global community.

Submit a project idea

Partner with us to advance your mission by leveraging data science to answer questions about your programs or the communities you serve, cut costs and improve efficiency, or predict future needs and better allocate resources.

Give to DataKind

Help in a way that works best for you, whether that be gifts of securities or in-kind donations, enabling DataKind to continue to harness the power of data science and AI in the service of humanity.

Join a Chapter

Get involved in the Data for Good movement in your community, organizing events and connecting local data science volunteers with social sector professionals to uncover world-changing answers through data.

Endow a data science role

Select members of our volunteer teams have highly specialized skills, be it specific vertical data science applications or supervising horizontal data-ethics processes across projects. Your endowment supports the critical specialization required to drive optimal impact.

Attend a community event

Join us for one of our project showcases or educational webinars, gaining access to our network of data science and AI leaders, learnings, and opportunities.

Sign up for our newsletter
share our mission far and wide

Our newsletter is the best place for the latest on all DataKind activities, but also a great resource for news and upcoming events in the wider Data For Good ecosystem. Join our mailing list, and share the next edition with a friend to grow our community!
