8. UPGRADE FROM EVENT CATEGORY III TO EVENT CATEGORY II

8.1. Calculation and Observation

8.1.1. FITEQ analyses the world ranking points of participating players in various competitions over the past two years across five categories. After ranking the events in ascending order, FITEQ calculates the median for each category. This median value serves as a dividing point, with 50% of the events falling on the right and 50% on the left. FITEQ then identifies the events where all categories have a total world ranking sum higher than the median for that category.

8.2. Upgrade Process:

8.2.1. FITEQ verifies cumulative World Ranking points during the registration period.

8.2.2. If the required WR points are met, FITEQ officially announces the upgraded Event Category on its website.

9. UPGRADE FROM EVENT CATEGORY V TO EVENT CATEGORY IV

9.1. If a Category V Event reaches all requirements for Category IV, it can be upgraded to Category IV after the event successfully takes place.

10. DOWNGRADE – FAILING TO MEET THE REQUIREMENTS

10.1. All registrations must be submitted to FITEQ (competition@fiteq.org) for publication, two weeks prior to the competition to ensure the Event Category can be approved for the event.

10.2. If the expected requirements are not met two weeks before the competition, it may be downgraded to a lower Event Category or excluded from receiving World Ranking points.

10.3. If an organizer fails to meet the expected requirements, they will not be eligible to apply for the same level of event category; only lower-level event categories will remain available.

All results, photos, and videos must be submitted to FITEQ within one week following the event, along with the **EVENT REPORT FORM**.

This policy is designed to ensure the standardization of teqball events across different Event Categories and to provide a clear path for the upgrade of categories based on the performance and World Ranking points of the participating players.
