ISSI validation report

AWS Partner Competency

Grid Dynamics & Amazon Web Services

With 15 years of extensive expertise in Amazon Web Services, Cloudops and DevOps, Grid Dynamics provides businesses with flexible and scalable solutions to drive digital value in the cloud.

Grid Dynamics & Amazon Web Services

ISSI validations

Information Security Systems International (ISSI) manages Partner Audit Programs for the world's industry-leading cloud services companies, and works directly with Partners to help them achieve program compliance. Through a series of ISSI audits, our AWS Competencies are ISSI-validated. The objective of ISSI validation reports is to assess Grid Dynamics' capabilities against the requirements of the AWS Competency Programs.

AWS Migration Competency

ISSI validation

AWS Migration strengths

The following organizational strengths were noted during the ISSI audit:

- Grid Dynamics Holdings is an AWS Advanced Consulting Partner, has been confirmed into the AWS DevOps, Retail, and Data & Analytics Competencies, and holds the Amazon EMR and Amazon EKS Delivery Service Delivery Designations.

- The audit validated Grid Dynamics' operational capabilities against program requirements for the AWS Migration Competency. This was assessed through discussion with Grid Dynamics and by reviewing Grid Dynamics' processes and procedures.

- Grid Dynamics presented strong objective evidence of due diligence with respect to the AWS Migration Competency Checklist.

- Grid Dynamics leverages an impressive internal wiki (Confluence) containing their knowledge base and best practices.

- Grid Dynamics demonstrated a comprehensive method for post-engagement knowledge transfer and support.

- Grid Dynamics demonstrated that they are well-aligned with and show a strong commitment to AWS and its services.

- Grid Dynamics demonstrated that they are customer-obsessed through helping customers by reducing costs and improving performance rather than just completing a simple lift-and-shift.

- Grid Dynamics demonstrated a consistent approach to developing and leveraging repeatable methodologies and patterns that create reusable artifacts (e.g., project plan templates, methodology documents, AWS CloudFormation/Terraform templates, etc.) used in their submitted case studies.

AWS Data and Analytics Competency

ISSI validation

AWS Data and Analytics strengths

The following organizational strengths were noted during the audit:

- Grid Dynamics Holdings is an AWS Advanced Consulting Partner, has been confirmed into the AWS DevOps, Retail, and Migration Competencies, and holds the Amazon EMR and Amazon EKS Delivery Service Delivery Designations.

- The audit validated Grid Dynamics' operational capabilities against program requirements for the AWS Data & Analytics Competency. This was assessed through discussion with Grid Dynamics and by reviewing Grid Dynamics' processes and procedures.

- Grid Dynamics presented strong objective evidence of due diligence with respect to the AWS Data & Analytics Competency Checklist.

- Grid Dynamics demonstrated that they are well-aligned with and show a strong commitment to AWS and its services.

- Grid Dynamics demonstrated a comprehensive method for post-engagement knowledge transfer and support.

- Grid Dynamics demonstrated a consistent approach to developing and leveraging repeatable methodologies and patterns that create reusable artifacts (e.g., project plan templates, methodology documents, AWS CloudFormation templates, etc.) used in their submitted case studies.

- Grid Dynamics demonstrated a formal process for closing the loop with respect to Lessons Learned during customer engagements.

- Grid Dynamics leverages an impressive internal wiki (Confluence) containing their knowledge base and best practices.

AWS DevOps Competency

ISSI validation

AWS DevOps strengths

The following organizational strengths were noted during the audit:

- Grid Dynamics Holdings is an AWS Advanced Consulting Partner, has been confirmed into the AWS Data & Analytics, Retail, and Migration Competencies, and holds the Amazon EMR and Amazon EKS Delivery Service Delivery Designations.

- The audit validated Grid Dynamics' operational capabilities against program requirements for the AWS DevOps Competency. This was assessed through discussion with Grid Dynamics and by reviewing Grid Dynamics' processes and procedures.

- Grid Dynamics presented strong objective evidence of due diligence with respect to the AWS DevOps Competency Checklist.

- Grid Dynamics demonstrated a consistent approach to developing and leveraging repeatable methodologies and patterns that create reusable artifacts (e.g., project plan templates, methodology documents, AWS CloudFormation templates, etc.) used in their submitted case studies.

- Grid Dynamics leverages a well-documented internal technical training program for their DevOps personnel.

- Grid Dynamics demonstrated that they are well-aligned with and show a strong commitment to AWS and its services.

- Grid Dynamics demonstrated a formal process for closing the loop with respect to Lessons Learned during customer engagements.

- Grid Dynamics leverages an impressive internal wiki (Confluence) containing their knowledge base and best practices.

AWS Retail Competency

ISSI validation

AWS Retail strengths

The following organizational strengths were noted during the audit:

- Grid Dynamics Holdings is an AWS Advanced Consulting Partner, has been confirmed into the AWS DevOps, Data & Analytics, and Migration Competencies, and holds the Amazon EMR and Amazon EKS Delivery Service Delivery Designations.

- The audit validated Grid Dynamics' operational capabilities against program requirements for the AWS Retail Competency. This was assessed through discussion with Grid Dynamics and by reviewing Grid Dynamics' processes and procedures.

- Grid Dynamics presented strong objective evidence of due diligence with respect to the AWS Retail Competency Checklist.

- Grid Dynamics leverages an impressive internal wiki (Confluence) containing their knowledge base and best practices.

- Grid Dynamics demonstrated a comprehensive method for post-engagement knowledge transfer and support.

- Grid Dynamics demonstrated that they are well-aligned with and show a strong commitment to AWS and its services.

- Grid Dynamics demonstrated a consistent approach to developing and leveraging repeatable methodologies and patterns that create reusable artifacts (e.g., project plan templates, methodology documents, AWS CloudFormation/Terraform templates, etc.) used in their submitted case studies.
