

Business router options

We can offer the Linksys Velop MX5600 Dual-Band Mesh Wifi 6 router and the Technicolor Dual-Band WiFi 6 router as an additional monthly chargeable option upon request.

These wireless WiFi routers increase network capacity and allow more users to enjoy superior connectivity with extremely low latency. Perfect for large file transfers, cloud service access and high-quality conference calls.

Speeds specifications are subject to interferences and the LAN capabilities of devices used. Speeds may vary from manufacturer specifications.

From 1st April every year we will increase the monthly price of broadband and additional services by the Government published Consumer Price Index (CPI) from January of the same year and add an extra 2.9%. If your contract start date is between 1 January 2025 and 1 April 2025, you will not be subject to this increase in the first year of your Contracted Agreement, but you will in all subsequent years of your Agreement. This excludes Ultrafast 150 Mbps which is a fixed term contract and is not subject to this annual increase.

* Requires device to be WiFi 6 capable.
